

Algorithm Comparison

	Mode 0 Stop-and-Restart	Mode 1 Adaptive Hot-Swap	Mode 2 Reactive
Transition method	Stop all, restart all	Hot-swap only changed views	Hot-swap + monitor & correct
Downtime	Full stop (seconds)	Zero for kept views	Zero for kept views
Throughput gap	Yes (model loading)	Minimal (old serves)	Minimal (old serves)
Self-correcting	No	No	Yes (rollback/fallback)
Key file	unified_viewer.py	adaptive_deploy.py	reactive_deploy.py
Complexity	Low	Medium	High
